“All your process control needs”

VALVELink

All your process control needs

ValveLink Vietnam is one-stop center for industrial valves, flowmeters, and controls, providing top-notch products at competitive prices with fast delivery.

We serve our customers from our headquarters in Ho Chi Minh City, Vietnam and regional offices in Hanoi, Da Nang, and Can Tho. This extensive network ensures efficient and high-quality service throughout the country.

VALVELink “All your process control needs”

Mission and Vision Statements

Mission

Our mission is to establish ValveLink Vietnam as the premier one-stop center for industrial valves, flowmeters, and controls. We commit to providing top-notch products at competitive prices with exceptionally fast delivery. We aim to meet the needs of our customers in Vietnam and globally with superior quality, reliability, and outstanding customer service.

Vision

Our vision is to expand our reach and become the leading supplier of industrial valves and controls throughout ASEAN, Asia and Europe. Recognized for our innovation, we are committed to excellence and dedicated to customer satisfaction. We continually strive to set the industry standard by enhancing our products and services to meet the evolving demands of our clients.

Why Choose ValveLink?

Proactive Production Capabilities

- **Proactive production planning** to anticipate demand and avoid delays
- **Manufacturing in advance** based on market trends and customer needs
- **Shorter lead times** thanks to always-ready stock
- **Minimized supply disruptions** through continuous production flow
- **Stronger delivery reliability** for urgent or large-volume orders

Why Choose ValveLink?

Unmatched Delivery Speed

- Over 20,000 SKUs stocked in Vietnam warehouse.
- Fastest delivery time compared to European and regional competitors.
- ValveLink ensures prompt delivery across all transport mediums, whether by land or sea.
- We prioritize efficiency, achieving the fastest industry turnaround times to keep your operations on schedule.

Why Choose ValveLink?

Advanced Augmented Reality (AR) Servicing Technology

- Utilizes cutting-edge AR technology to provide real-time, immersive consultations and servicing.
- This state-of-the-art approach enables precise diagnostics and swift problem resolution, enhancing overall service quality.
- Our innovative servicing methods significantly reduce system downtime.

Why Choose ValveLink?

ASEAN's First Steam & Industry 4.0 Simulation Center

- i4Center provides immersive, real-life experience for partners and clients—see how solutions work before buying

Why Choose ValveLink?

Partner-Focused Sales & Technical Training

- Modeled after leading European strategies.
- Dedicated training programs focused on sales skills and technical selling to help partners scale with confidence.

Why Choose ValveLink?

EcoClad® – ESG Contribution

- Environmental – Reduces heat loss, saves energy, and directly supports factories in achieving carbon neutrality and meeting CBAM requirements.
- Social– Improves the working environment by lowering surface temperatures, enhancing operator safety, and reducing ambient heat stress in production areas.
- Governance– Provides measurable data for sustainability reporting, supports ISO 14001 compliance, and strengthens corporate transparency in energy management initiatives.

VALVELink “All your process control needs”

ValveLink's Premier Global Brand

Valvelink Brand Introduction and Specialized High-End Product Offering:

In-house brand born from extensive industry experience, set to manufacture specialized, high-end industrial valves, flowmeters, and controls.

Global Standards with Budget Flexibility:

Valvelink is crafted to meet rigorous global standards, accommodating all budgetary needs, and supported by world-class, globally recognized servicing.

World-Class Support with Advanced Augmented Reality Servicing Technology:

Valvelink incorporates state-of-the-art AR Smart Servicing technology, ensuring superior speed and accuracy in servicing. The best service anywhere around the world.

CORE VALUES

1

Technically Competent

Our Sales & Services Teams are technically trained and upskilled both locally and overseas to be well equipped on product and process knowledge, applications and solutions.

2

Integrity

We conduct our business with honesty and uphold strong moral principles in all our actions.
We work together as a team to meet the needs of our customers and to help our Company win.

3

Services and Solutions

We deliver top quality products and unsurpassed services and solutions to our customers. We offer **high-quality products, free** services and solutions for design, product, and process consulting, as well as equipment testing. Additionally, we provide technical seminars and maintain a full stock of products and components to enhance customer productivity and efficiency.

CORE VALUES

4

Professional

Our employees are trained to provide professional services with conscientiousness, competence and reliability.

5

Continuous Innovation

We are tech-savvy and stress on continuous innovation, observing the changes in in the marketplace, embracing the latest technology, pivoting new business models and moving 3-steps ahead of competitions.

6

Care

We work as a family, caring and supporting each other creating a happy and meaningful working environment, achieving growth and development for both self and Company. We are committed to humane entrepreneurship and are working towards 3 sustainable goals of **People - Earth - Profit** to maximize improvements in financial, social and environmental well-being.

CORE VALUES

ADVANCED

Business systems, it's all about enhancing the advantages for customer, companies, employees and society

SHARE

Caring and sharing among employees help them to connect, develop and learn

TRAINING

Keep an eye on employees' workload and provide training as needed

PERFORMANCE

Recognition based on outcomes

INTEGRITY

Every role is taken seriously and trusted

JOINING

Collaboration among the Board of Directors, management and employees is essential.

WHY CHOOSE VALVELINK'S IOT SOLUTIONS

Over 35 years of expertise in technology, innovation, conservation, and solutions

ESG-guided solutions – Sustainable, compliance-driven innovations.

Modular solutions – Scalable, plug-and-play systems for seamless integration.

In-house servicing – i4Service – Reliable support, maintenance, and troubleshooting.

ROI-centric solutions – Designed to maximize efficiency and cost savings.

Industry 4.0 Academy – Training and certification for the digital era.

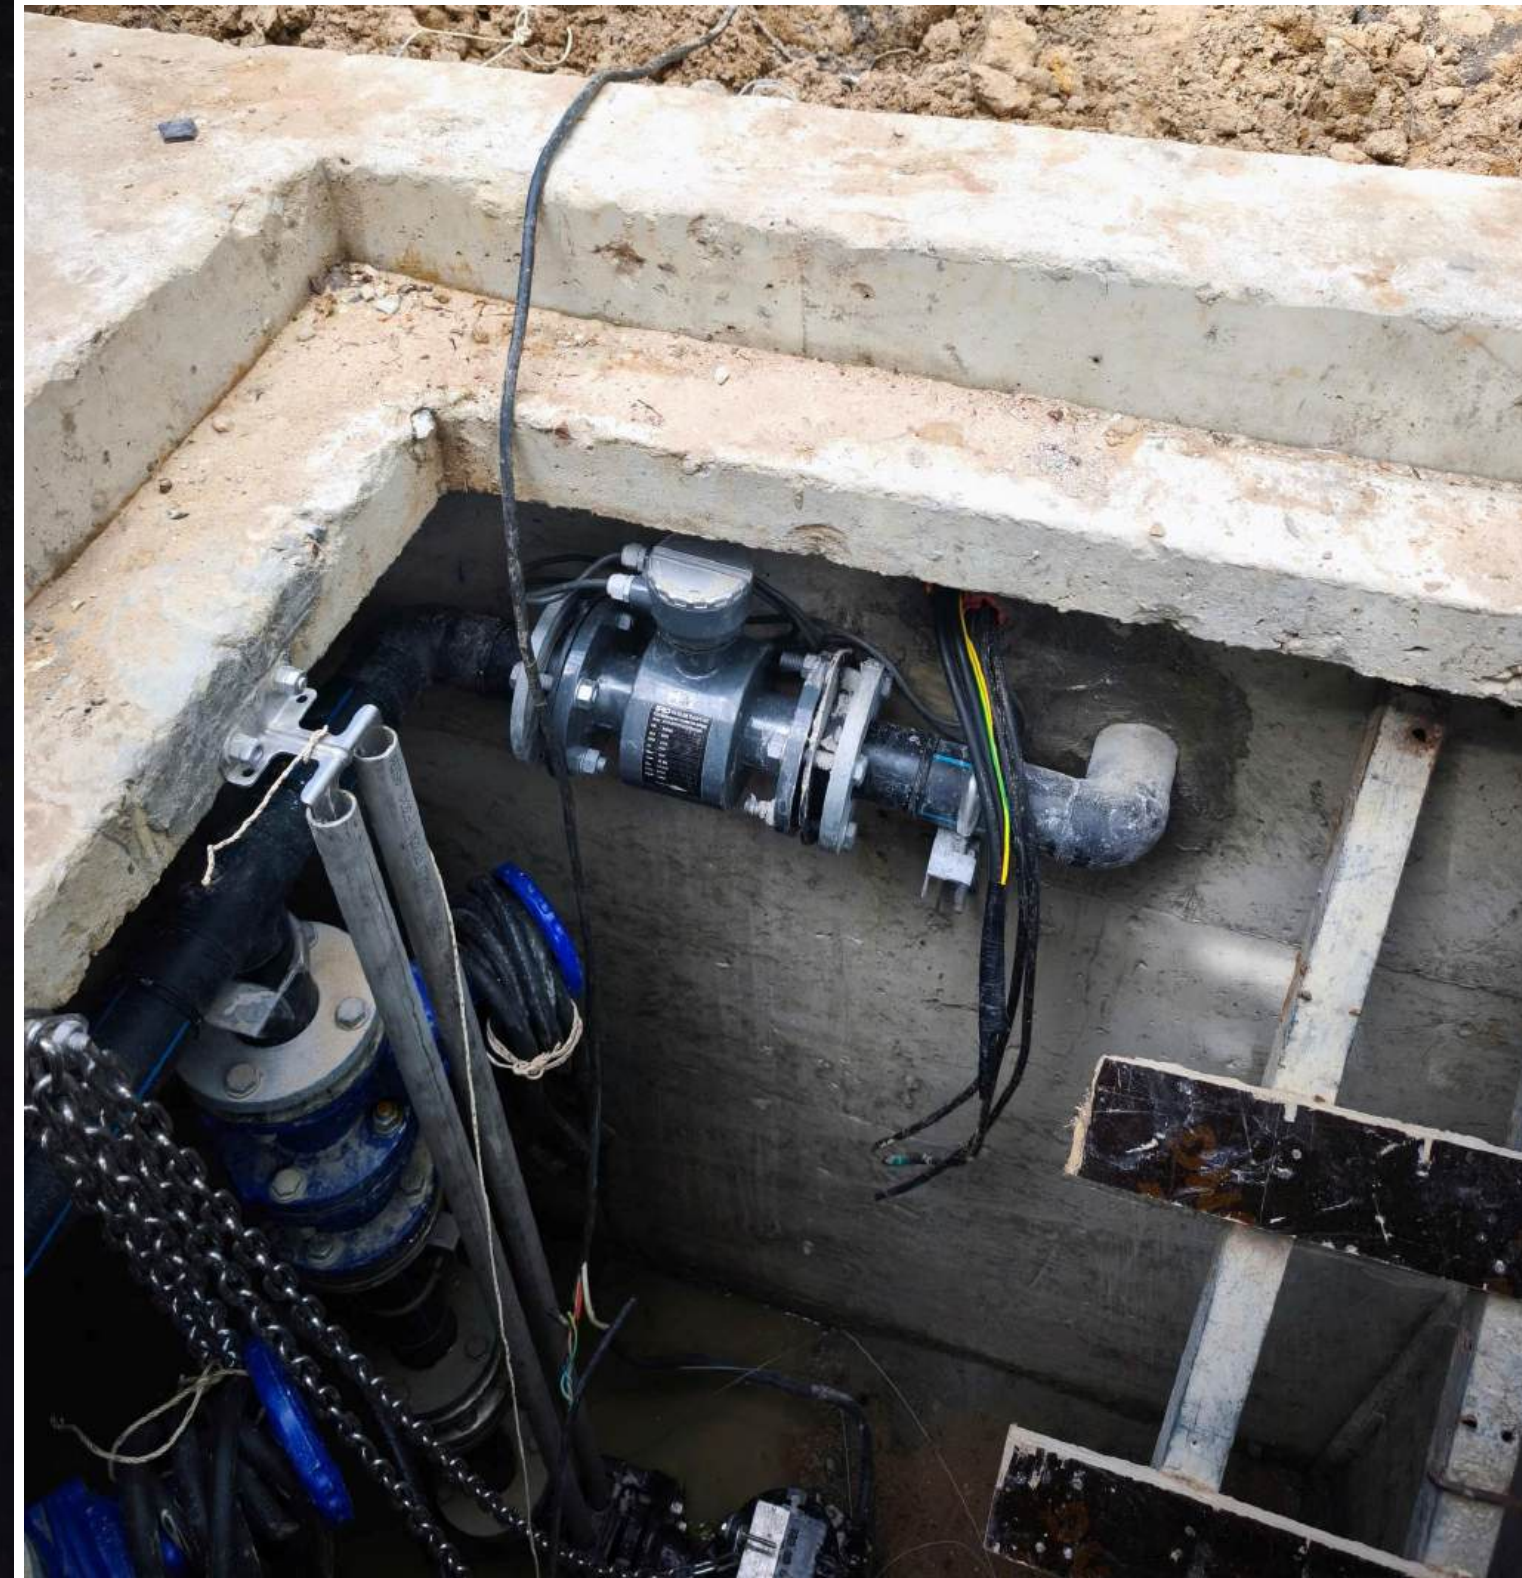

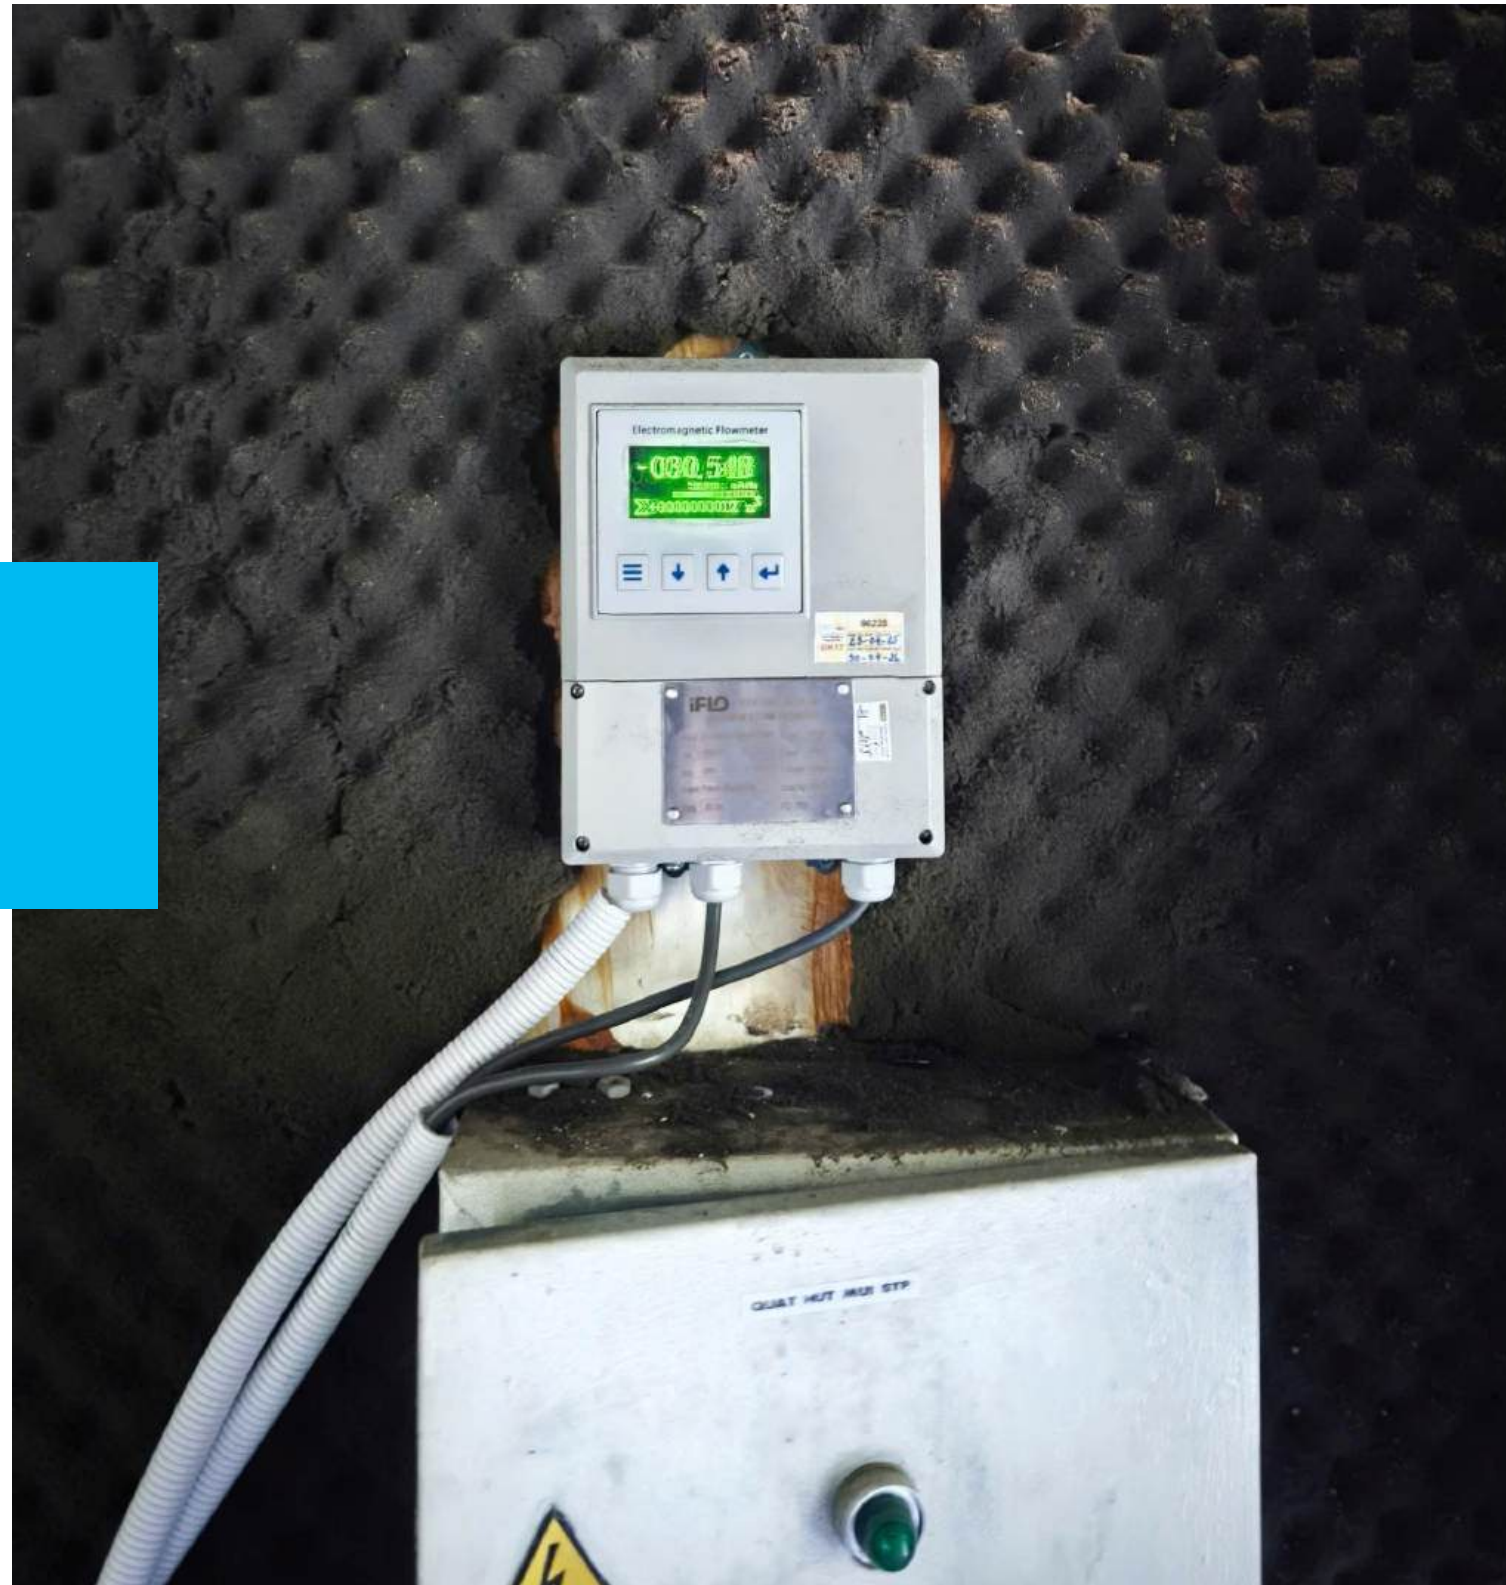

FREE guided factory survey – Expert assessment to identify inefficiencies and optimize operations.

Rental Financing Solution – Adopt Industry 4.0 tech with zero upfront risk.
